RE: **Code Grey Update – Air Quality Improvement**

We are pleased to share that air quality in our area has improved. As a result, the Code Grey status at Holland Christian Homes has been lifted, and normal operations and activities have now resumed.

The health and well-being of our residents remain our highest priority. We will continue to monitor air quality and environmental conditions closely. If air quality deteriorates and returns to high-risk levels, Code Grey emergency preparedness measures will be reinstated to help protect the health and safety of our residents, families, care partners, and visitors. Should this become necessary, we will provide timely updates and communicate any changes to our operations.

Thank you for your patience, cooperation, and understanding throughout this period. We appreciate your continued support as we work together to maintain a safe and healthy environment for everyone in our community.

As the situation changes or is warranted, we will post regular updates to the HCH website and channel 990.
